

SCEC-Endorsed Security Zone Consultant Register

SCEC-endorsed Security Zone Consultants are endorsed to provide physical security advice at the request of Australian Government entities regarding:

- design, acceptance testing and commissioning of Type 1A Security Alarm Systems; and
- design and construction of security zones as defined in the *Australian Government Protective Security Policy Framework* and *ASIO-T4 Technical Notes*.

SCEC-endorsed Security Zone Consultants are not trained or endorsed by SCEC to perform any service outside the scope of their endorsement outlined above (including, for example, providing advice on hostile vehicle mitigation, ballistic treatments, or blast-mitigation measures). If an entity chooses to engage a SCEC-endorsed Security Zone Consultant to perform services outside the scope of SCEC-endorsement, the entity is responsible for confirming the consultant's competency and ability to perform these services appropriately.

All SCEC-endorsed Security Zone Consultants hold at minimum an NV1 security clearance. Any requirement for a SCEC security zone consultant to hold a higher security clearance will be up to the entity to manage. Upon the engagement of a SCEC-endorsed Security Zone Consultant, the entity must confirm that the consultant is cleared to work in/on the designated area, or be appropriately escorted in line with the *Protective Security Policy Framework*.

The requirement for security licensing varies depending on the State or Territory the work is being completed in. Agencies should confirm the SCEC-Endorsed Security Zone Consultant is eligible to provide security services within the relevant State or Territory.

For information or updates, please contact SCEC at scec@scec.gov.au.

Handling instruction

This document is protectively marked OFFICIAL: Sensitive, which means it contains information which may cause limited damage to an individual, organisation or government if compromised. You must take all reasonable action to protect and maintain the security of this document. This information must only be shared with individuals within your agency with a demonstrated 'need-to-know'. This document must be stored in a lockable container and cross-cut shredded prior to disposal. This document may be stored on electronic media, provided it is stored, handled and disposed of in accordance with the Australian Government *Protective Security Policy Framework and Information Security Manual*.
